

## Microsoft 365 E5 Plan

### Microsoft 365 E5 includes

Word, Excel, PowerPoint, Outlook, OneNote, SharePoint, OneDrive, Microsoft Teams, Microsoft Stream, Power BI Pro

### Features unique to Microsoft 365 E5:

#### **Azure Active Directory Premium 1 & 2**

Enhance security, simplify access, and set smart policies with a single identity platform.

#### **Office 365 Advanced Threat Protection**

Protect your organization against sophisticated attacks such as phishing and zero-day malware.

#### **Azure Information Protection P2**

Discover, classify, label, and protect sensitive documents and emails.

#### **Advanced compliance**

Perform risk assessments across Microsoft Cloud services, automatically protect and govern sensitive data throughout its lifecycle, and efficiently respond to regulatory requests.

#### **Phone System**

Enable call control and PBX capabilities in the cloud with Microsoft Teams and Skype for Business Online.

#### **Microsoft Defender Advanced Threat Protection**

Use a unified platform for preventative protection, post-breach detection, automated investigation, and response.

### **PowerApps for Office 365**

Build the business apps you need and extend or customize the apps you already use.

### **Planner**

Organize teamwork.

### **MyAnalytics**

Explore your work patterns and learn ways to work smarter.

### **Windows Autopilot**

Reduce overall costs of deploying, managing, and retiring Windows devices by leveraging cloud-based services.

### **Device Health**

Proactively remediate common end-user device issues, reduce support calls, and improve end-user productivity.

### **Microsoft Intune**

Enable your workforce to be productive on all their mobile devices, while helping to keep your organization's information protected.

### **Credential Guard**

Protect derived domain credentials.

### **Microsoft Advanced Threat Analytics**

Reduce your risk of damage and get information in a succinct, real-time view of the attack timeline.

### **Device Guard**

Help prevent malicious code from running by ensuring only known good code can run.

### **Windows Information Protection**

Protect enterprise apps and data against accidental data leak on enterprise and personal devices.

### **Microsoft Secure Score**

Increase your visibility and control over your organization's security posture with a centralized dashboard.

### **Microsoft 365 Apps for enterprise**

Install Office client apps (Word, Excel, PowerPoint, OneNote, Access) on up to five PCs or Macs, five tablets, and five smartphones per user.

### **Office Online**

Create, share, and collaborate with Office on the web.

### **Exchange**

Work smarter with business-class email and calendaring.

### **SharePoint**

Share and manage content, knowledge, and applications to empower teamwork.

### **OneDrive for Business**

Access, share, and collaborate on files from anywhere.

### **Sway**

Create visually striking newsletters, presentations, and documentation in minutes.

### **Power Automate for Office 365**

Make repetitive tasks easy with workflow automation.

### **Microsoft To-Do**

Plan your day and manage your life.

### **Microsoft 365 Admin Center**

Set up your organization in the cloud. Manage users and subscriptions, reset passwords, and much more.

### **Windows Analytics**

Review and monitor an extensive amount of data about the state of devices in your deployment.

## **System Configuration Manager**

Deploy software, protect data, monitor health, and enforce compliance across all devices in an organization within a unified management console.

## **Windows Hello**

Sign into laptops, tablets, devices, or apps fast and password-free.

## **Direct Access**

Connect remote users without the need for traditional Virtual Private Network (VPN) connections.

## **Windows Defender Antivirus**

Protect against software threats like viruses, malware, and spyware across email, apps, the cloud, and the web.

## **Microsoft 365 data loss prevention**

Use automatic or ad-hoc policies to protect sensitive messages regardless of the recipient's email domain.

## **BitLocker**

Address threats of data theft or exposure from lost, stolen, or inappropriately decommissioned computers.

## **Microsoft Security and Compliance Center**

Monitor your overall compliance posture, review recommended actions, and configure settings to meet complex compliance obligations.

## **SharePoint Online**

Share and manage content, knowledge, and applications to empower teamwork.

## **Yammer**

Connect and engage with enterprise social networking.

## **Windows Hello**

Sign into laptops, tablets, devices, or apps fast and password-free.

## **Windows Server, RMS, and Microsoft Identity Management CAL equivalency**

### **Credential Guard**

Protect derived domain credentials.

### **Azure Active Directory Identity Protection Plan 1**

Enhance security, simplify access, and set smart policies with a single identity platform.

### **Windows Defender Antivirus**

Protect against software threats like viruses, malware, and spyware across email, apps, the cloud, and the web.

### **Windows Defender Application Guard**

Isolate enterprise-defined untrusted sites to protect your company while employees use the internet.

### **BitLocker and BitLocker To Go**

Address threats of data theft or exposure from lost, stolen, or inappropriately decommissioned computers.
